VERSAPOINT® RF WIRELESS KEYBOARD

Model No. VP6210

Continuing Interlink's tradition of delivering thousands of award winning wireless keyboards, the VersaPointRF Wireless Keyboard combines mouse pointing with touch typing, all in a convenient wireless package. It's perfect for video conferencing, collaborative meetings, Internet browsing, multimedia applications, and everyday computing.

Sleek Design Compact, yet versatile– you get all the functions of a full size keyboard. Quiet keys have tactile feedback for effortless touch typing.

Large Mouse Button
The same easy 360° navigation as the new, award winning RemotePointRF they're completely compatible!

Broadbeam RF Technology
Broadbeam RF signals are so powerful there is no need to aim directly at the receiver. Point it almost anywhere. And, with the ability to set 8 different addresses, you can use several keyboards simultaneously without interference.

Simple Connections
Installation is a snap! Just plug the omnidirectional RF receiver into your PC and go. No special drivers needed.

▼ Additional Left-Click Buttons
A second, auxiliary, set of left-click buttons are comfortably positioned at the front of the VersaPointRF where your fingers naturally grip the keyboard

▲ Lap Shaped Contours
Contours on the bottom of the keyboard make it just as comfortable on your lap as it is on your desk or held in your hand.
